Deputy Minister

# Foreword

Statistics can add up to new profits for the Ontario businessman. This publication is designed to assist manufacturers and others in assessing export market potential, as well as to obtain new sales in Canada.

The 1968 edition of *Statistics For Profit* incorporates four sections, three of which were previously published as separate booklets. The first section introduces a tabulation of Ontario exports by commodities, published for the first time.

The figures show that Ontario accounts for 78 per cent of all fully manufactured exports from Canada, and 36 per cent of total exports.

In all, 24 per cent of United States imports are from Canada. From Canada's point of view, the U.S. market represents 60 per cent of its total exports. In trade with the United Kingdom, Canadian commodities account for 7 per cent of Britain's total merchandise imports. This total represents 11 per cent of all Canada's exports.

Fully manufactured goods comprise more than half Canada's exports to the U.S., and 41 per cent of its exports to the United Kingdom.

To assist Ontario manufacturers and businessmen in gaining new markets, the trade and industry branch of the Ontario Department of Economics and Development offers free advisory services conducted on a confidential basis. These services are available to any company interested in developing exports or new sales, acquiring new product lines, or entering manufacturing agreements.

RESEARCH SECTION,  
TRADE AND INDUSTRY BRANCH.

# *World Markets for Ontario Products*

Ontario exports are listed by commodities, using the Standard Industrial Classification order of sequence. This section indicates areas of principal export opportunities, and manufacturers, not already exporting, are invited to consider these markets.

Data are selected from reports obtained from the Dominion Bureau of Statistics. Listings are for 1965 and 1966, showing both the Ontario and Canadian figures, and Ontario's percentage of the Canadian total.

In 1965, Ontario's exports accounted for 32.1 per cent of the Canadian total, rising to 36.4 per cent in 1966. Ontario's exports of fully manufactured goods (Section 5—end products, inedible) accounted for 71 per cent of all Canadian manufactured exports in 1965. The following year, manufactured exports rose to 78 per cent of the national total.

Only the most significant countries of export are included in this listing, but details on other countries may be obtained from the Trade and Industry Branch, Ontario Department of Economics and Development.

# A SUMMARY OF ONTARIO EXPORTS BY SECTIONS, FOR THE YEARS 1965-1966, AND THEIR RELATION TO TOTAL CANADIAN EXPORTS

(Value in Canadian \$'000.)

# *United States Imports and Canadian Export Opportunities*

This section is designed primarily to acquaint Ontario manufacturers with the many opportunities that exist for marketing their products in the United States.

In 1966, 24 per cent of all U.S. imports were from Canada. From Canada's point of view, the U.S. market represents 60 per cent of its total exports. About 53 per cent of all U.S. imports were accounted for by fully manufactured goods. Of this amount, import of Canadian products represented 24 per cent. Fully manufactured goods represented 52 per cent of total Canadian exports to the U.S.

Part I of this section contains selected U.S. imports compiled from reports of the U.S. Bureau of the Census for 1965 and 1966. Included are totals for the commodity sections and groups, but sub-classes have been chosen arbitrarily on the basis of importance within the group, and whether Canada has a significant share. These tabulations will assist in showing that a market exists for products indicated.

Part II shows Canadian exports to the U.S. of End Products, Inedible. Due to space limitations and relative importance, many commodities are not included. However, detailed information on these commodities may be obtained from the trade and industry branch, Ontario Department of Economics and Development.

# *United Kingdom Imports and Canadian Export Opportunities*

This section will acquaint Ontario manufacturers with current opportunities to participate in the United Kingdom market.

In 1966, U.K. imports from Canada accounted for 7 per cent of its total merchandise imports. For Canada, this represented about 11 per cent of its total exports—a decrease of 3 per cent from the previous year. Forty-one per cent of Canada's exports to the U.K. were fully manufactured.

United Kingdom imports for 1965 and 1966, contained in Part I of this section, indicate the position accounted for by imports from Canada. This data is taken from United Nations Department of Economic and Social Affairs Reports, which are compiled from information submitted by the United Kingdom. The Standard International Trade Classification (SITC) is used as the United Nations reporting system. It is the basis for over 80 per cent of all trading data from countries around the world, including Canada.

Part II contains Dominion Bureau of Statistics data on Canadian exports to the U.K. of End Products, Inedible. The DBS classification covers fully manufactured products requiring no additional fabrication before use.

In utilizing this information in developing an export program, manufacturers are advised to make use of the varied services and background knowledge of governmental agencies engaged in this specialized field.

90099	Miscellaneous stationers' and office supplies and artists' materials	328.0	261.7
91059	Miscellaneous photographic film and plates—unexposed	200.9	209.2
91099	Miscellaneous photographic equipment and supplies	197.8	175.6
96005	Buttons, needles, pins, miscellaneous notions, and parts	597.0	616.2
96010	Nonelectric lighting fixtures, supplies and parts	29.0	12.0
96049	Prefabricated buildings, structures, and parts	—	183.8

# Fabrication Gaps in Canadian Industry

Canadian import data is compiled by the Dominion Bureau of Statistics and is important to the manufacturer for two reasons.

First, imports prove the existence of developed, profitable markets in Canada where demands are being satisfied by products manufactured outside Canada. Second, import statistics are published monthly with a time-lag of only three or four months, in contrast to the annual publication of Canadian production figures, which lag about 18 months. Accordingly, import statistics provide an early sign of changing demand.

Part I of this section contains the annual data on over 700 imported commodity groups. Many of these categories contain hundreds of identifiably different items, any one of which may offer a manufacturing opportunity for Canadian firms.

While detail at the commodity level is not available on a continuing basis, the federal Department of Industry, in conjunction with DBS, will prepare special studies upon request. These listings cover several months and are finely broken down.

Part II shows Canada's imports re-classified into the United Nations Standard International Trade Classification (SITC) at the three-digit merchandise group level. These are directly comparable with equivalent groups imported by the U.K. and the U.S. shown in the other sections of this publication. Considered together, the total three-country import market for any group is quickly determined.

## EXPLANATORY NOTES:

n.e.s.	not elsewhere specified
T.I.	tariff item
C.R.	cold rolled
H.R.	hot rolled
-	no equivalent class
--	not available
*	less than \$50,000

## Foreword

Statistics for Profit is published to assist Ontario manufacturers and others assess domestic and foreign market potential, using statistical data as a guidepost for these opportunities.

This edition is more Ontario-oriented than previous editions. It includes data on Ontario exports to the U.S. and U.K. of "end products, inedible" and Ontario exports to selected countries, 1966 and 1967.

Ontario exports in 1967 reached \$4,650,000,000, an increase of 23.8 per cent over 1966, and total Canadian exports showed an increase of 10.51 per cent. Ontario exports to the United States in 1967 increased by 28.7 per cent, and total Canadian exports to the U.S. increased by 17.45 per cent. Ontario exports to the United Kingdom in 1967 increased by 12.6 per cent, and total Canadian exports to the U.K. increased 4.08 per cent.

In 1967, Ontario exports made up 40.8 per cent of total Canadian exports. The previous year they represented 36.4 per cent of total Canadian exports.

By far the largest advance in Ontario exports in 1967 was accounted for by fully manufactured products which showed an increase of 42 per cent over 1966. As a percentage of total Canadian exports of fully manufactured goods in 1967, Ontario accounted for 77 per cent.

A major portion of the fully manufactured export increases reflected the expanded motor vehicle trade with the U.S. When automotive products are extracted from this total there is still a 26 per cent increase over 1966. This increase represented a variety of fully manufactured products, including electric lighting and control equipment, radio and TV sets, communications equipment, metal working machinery, conveyors and elevating machinery, office machinery and equipment, and aircraft and parts.

Opportunity for local industrial expansion is evident by a 12.3 per cent increase in Canadian imports, from \$9,900,000,000 in 1966 to \$11,100,000,000 in 1967. The increase in fully manufactured imports was 19.5 per cent during the same period.

To assist Ontario businessmen gain new markets for their products and enlarge existing ones, the Trade and Industry Division of the Ontario Department of Trade and Development offers free advisory services on a confidential basis. These services are available to any Ontario company interested in exporting products and services, acquiring new product lines, entering manufacturing agreements or joint ventures, or selling and buying know-how, patents and trademarks.

# *World Markets for Ontario Products*

Data for "Ontario Exports by Selected Commodities and Countries" are taken from special Dominion Bureau of Statistics reports. The classification used in this section is the Standard Industrial Classification of DBS. Ontario and Canadian exports of selected commodities to principal countries, and Ontario's percentage of the Canadian total, are shown categorized by sub-sections and groups. Details on Canadian and Ontario exports to other countries, not listed in this part of the publication, may be obtained from the Foreign Market Development Section, Research Branch, Department of Trade and Development, 950 Yonge Street, Toronto 5. Telephone 365-4347.

# A SUMMARY OF ONTARIO EXPORTS BY SECTIONS, FOR THE YEARS 1966-1967, AND THEIR RELATION TO TOTAL CANADIAN EXPORTS

Value in \$'000

# *United States Imports and Canadian Export Opportunities*

Geographic proximity of the United States to Canada and the close business relationship between the two countries favors mutual trade expansion. Each is the other's principal trading partner.

In 1967, Canada's share of total U.S. exports was U.S. \$7,033,000,000 or 22.6 per cent. On the other hand, U.S. purchases from Canada represented U.S. \$7,099,000,000 or 26.5 per cent of total imports. It is worthwhile noting that Canada has a perennial trade deficit with the U.S., which is offset by our trade surplus with third countries.

Ontario exports to the U.S. in 1967 were \$3,495,600,000, which represented 75.1 per cent of total Ontario exports, compared with 72.2 per cent in 1966. The increase in Ontario exports to the U.S. in 1967 occurred largely in the export of motor vehicles and parts, which accounted for about 40 per cent of these exports.

This section, United States Imports and Canadian Export Opportunities, contains selected U.S. imports, compiled from reports of the U.S. Bureau of Census for 1966 and 1967. Included are totals for commodity sections and groups, but sub-classes have been chosen arbitrarily on the basis of importance within the group, and whether Canada has a significant share.

The section, Ontario's Exports to the United States of End Products, Inedible, represents Ontario's fully manufactured exports compiled from DBS material.

# *United Kingdom Imports and Canadian Export Opportunities*

The United Kingdom's imports in 1967 reached U.S. \$17,714,300,000, up 6.3 per cent from 1966. At the same time imports from Canada rose by 5.4 per cent from U.S. \$1,190,300,000 in 1966 to U.S. \$1,254,600,000 in 1967. United Kingdom imports from Canada accounted for 7.1 per cent of their total imports in 1967.

The United Kingdom ranks second, after the United States, as Canada's most important market. In 1967, United Kingdom imports from Canada of "manufactured goods classified chiefly by material" embraced 34.64 per cent of the U.K.'s total imports from Canada. Principal Canadian imports in this class were paper and paper board (U.S. \$95,400,000), copper (U.S. \$98,800,000), and aluminum (U.S. \$68,900,000). Canada also accounted for 28.3 per cent of the U.K.'s imports of "crude materials, inedible, except fuels", and 20.9 per cent of its imports of "food and live animals."

Ontario exports to the U.K. of "end products, inedible" in 1967 were \$43,800,000. This part is compiled from DBS data and covers fully manufactured products requiring no additional fabrication before use. Ontario exports of fully manufactured goods to the U.K. in 1967 were only 10.33 per cent of Ontario's total exports to that country.

NOTE: This data is taken from United Nations Department of Economic and Social Affairs Reports, which are compiled from information submitted by the United Kingdom. The Standard International Trade Classification (SITC) is used as the United Nations' reporting system.

# Opportunities for Canadian Industry

Canadian import data compiled by the Dominion Bureau of Statistics is an important source of information for manufacturers. It indicates developed, profitable markets in Canada where demands are being satisfied by products shipped from abroad. The data points up production that domestic manufacturers may undertake themselves.

Total Canadian imports by sections, 1966-1967, were as follows:

	<u>1966</u>	<u>1967</u>
	(\$'000)	(\$'000)
<b>Live Animals</b>	<b>12,910</b>	<b>21,895</b>
<b>Food, Feed, Beverages and Tobacco</b>	<b>791,741</b>	<b>861,596</b>
<b>Crude Materials, Inedible</b>	<b>1,023,461</b>	<b>1,062,791</b>
<b>Fabricated Materials, Inedible</b>	<b>2,233,137</b>	<b>2,310,208</b>
<b>End Products, Inedible</b>	<b>5,483,420</b>	<b>6,555,397</b>
<b>Special Transactions - Trade</b>	<b>322,172</b>	<b>269,266</b>
<b>TOTAL</b>	<b><u>9,866,841</u></b>	<b><u>11,081,153</u></b>

Source: DBS Trade of Canada.

While Canada's total imports in 1967 increased by 12.3 per cent over the previous year, imports of "end products, inedible" increased by 19.5 per cent.

SECTION IV - FABRICATED MATERIALS - INEDIBLE (cont'd)				
44531	Sheet and Strip CS, H.R. - up to 12", n.e.s.	2.7	3.8	U.K.
44533	Carbon Steel Sheet, H.R. - 24"-51", miscellaneous	4.5	2.6	West Germany
44536	Carbon Steel Sheet, C.R. - under 24"	3.1	3.0	U.S.A.
44551	Carbon Steel Tinplate - sheet and strip	.9	.8	U.S.A.
44555	Carbon Steel, Galvanized - sheet and strip	2.2	2.1	U.S.A.
44559	Carbon Steel Terneplate - sheet and strip	3.8	3.2	U.S.A.
44562	Carbon Steel Sheet - miscellaneous, metal coated	5.4	5.8	U.S.A.
44581	Stainless Sheet, H.R. - thick, 60" or less	20.5	22.2	U.S.A.
44585	Stainless Sheet, C.R. - 18" or less	3.9	3.9	U.S.A.
44586	Stainless Sheet, C.R. - thin, 18"-51"	4.8	5.0	U.S.A.
44587	Stainless Sheet, C.R. - thick, 18"-51"	4.3	5.1	U.S.A.
44592	Silicon Steel - sheet and strip	10.8	9.7	U.S.A.
44605	Carbon Steel Bearing Pile	2.4	1.3	West Germany
44607	Carbon Steel, W.F. Beams - over 25"	4.1	3.4	U.S.A.
44610	Carbon Steel, W.F. Beams - miscellaneous	12.4	11.9	U.S.A.
44615	Steel Structural - over 6", miscellaneous	6.8	6.2	U.S.A.
44620	Steel Structural - 3"-6", miscellaneous	6.5	7.9	Belgium-Lux.
44630	Steel Structural - under 3", miscellaneous	6.3	5.9	Belgium-Lux.
44690	Carbon Steel Sheet Piling	3.3	2.0	U.K.
44823	Pressure Pipe, Tube - for boilers, etc.	-	-	-
44827	Seamless Steel Tubes - for bearings	-	-	-
44828	Welded Steel Tubes - mechanical	4.0	4.7	U.S.A.
44829	Steel Tubes - miscellaneous mechanical	5.5	5.3	U.S.A.
44831	Drill Pipe	-	-	-
44835	Pipes, C.S. - welding, over 4.5", new, n.e.s.	3.4	8.5	Japan
44836	Steel Oil Country Goods - miscellaneous	-	-	-
44838	Pipes and Tubes, C.S. - welded, new, n.e.s.	7.2	7.4	U.S.A.
44839	Transmission Pipe and Fittings - oil and gas	-	-	-
44844	Pipes, C.S. SMLS Hot Finished - new, n.e.s.	8.8	8.7	U.S.A.
44849	Pipes, C.S. SMLS Cold Finished - new, n.e.s.	3.8	4.8	U.S.A.
44879	Steel Pipes and Tubes - welded, miscellaneous	-	-	-
44911	Steel Wire - for rope	-	-	-
44919	Wire, Carbon Steel, Not Coated - n.e.s.	9.6	8.0	U.S.A.
44927	Wire, Carbon Steel, Not Coated - n.e.s.	9.6	3.7	U.K.
44939	Wire, Alloy Steel - n.e.s.	1.1	1.1	U.S.A.
45119	Aluminum Castings and Forgings	6.4	-	-
45124	Aluminum Plates	4.2	5.7	U.S.A.
45125	Aluminum Sheet, Strip - up to .025"	4.9	7.4	U.S.A.
45127	Aluminum Sheet, Strip - over .025"-.051"	2.5	3.6	U.S.A.
45128	Aluminum Sheets and Strips	-	-	-
45129	Aluminum Sheet, Strip - over .051"-1.25"	6.0	26.7	U.S.A.
45131	Aluminum Sheet and Strip - over .051"-1.25"	22.0	11.0	U.S.A.
46710	Steel Welding Rods and Electrodes	2.1	1.8	U.S.A.
46719	Welding Rods and Electrodes - miscellaneous	1.0	1.2	U.S.A.
46739	Welding Wire	2.9	2.6	U.S.A.
46809	Valves - auto, control or regulating	7.0	6.9	U.S.A.
46819	Valves - iron or steel, miscellaneous	15.9	17.3	U.S.A.
46829	Valves - brass, miscellaneous	4.1	4.6	U.S.A.
46844	Valves - miscellaneous	2.0	1.6	U.S.A.
46848	Valve Parts - including valve bodies	5.4	5.6	U.S.A.
46851	Pipe Fittings - iron or steel, unfinished	3.6	3.9	U.S.A.
46855	Pipe Fittings - welded type	5.5	5.7	U.S.A.

Import Class	Description	VALUE millions of dollars		Major Supplier
		1966	1967	
SECTION IV - FABRICATED MATERIALS - INEDIBLE (cont'd)				
46859	Pipe Fittings - iron or steel, finished, miscellaneous	13.0	13.9	U.S.A.
46879	Pipe Fittings - copper and copper alloy	3.4	5.6	U.S.A.
46908	Metal Stampings, for Bath Tubs	1.2	1.6	U.S.A.
46920	Metal Frames, for Handbags and Purses	1.3	1.4	U.S.A.
46928	Findings and Metal Parts of Jewellery	1.2	1.6	U.S.A.
46967	Bumper Face Bars - unfinished	-	-	-
46972	Tanks and Parts	2.9	2.4	U.S.A.
46975	Insulated Wire and Cable	10.9	12.5	U.S.A.

# Foreword

*Statistics for Profit* and its companion publication *Ontario Exports by Countries and Commodities* provide statistical data to help Ontario manufacturers make an assessment of foreign market potential.

Future growth of the Ontario economy is closely related to our ability to compete in foreign markets. Canada's domestic market is relatively small in comparison with the domestic or integrated markets of other developed countries. Exporting is vital – especially to those industries where productivity depends on the scale of production.

Over the last decade, Canada and Ontario have been successful in adapting their exports to the evolution of domestic industries and the demands of foreign markets. This is best indicated by the changing proportion of our exports of “manufactured goods” to our total exports. In 1960, Canadian exports of “End Products – Inedible” were \$411, 200,000 or 7.8 per cent of total Canadian exports. In 1968, these exports reached \$4,511,800,000 or 33.2 per cent of the total.

Viewed geographically, the pattern of our exports has not changed significantly. They are directed toward the highly industrialized countries. In 1960, the United States, United Kingdom, Japan, West Germany, Italy, and France absorbed 83.2 per cent of total Canadian exports. In 1968, these six countries absorbed 84.4 per cent of total Canadian exports.

Ontario exports in 1968 were 44.0 per cent of the Canadian total and 78.9 per cent of Canadian exports of “End Products – Inedible,” compared to 40.8 per cent and 77.0 per cent respectively in 1967. About 90.0 per cent of the increase in Ontario exports in 1968 was accounted for by sales to the United States. By commodity groups, the largest increase occurred in Ontario

exports of "Road Motor Vehicles" to the United States, with a 63.3 per cent rise over 1967.

The outlook for Canadian exports in the near future will be greatly influenced by the capacity of our principal trade partners, especially the United States, to import foreign goods. However, any slowdown of the growth rate of exports to our principal markets can be partly offset by increasing exports to other world areas. Coupled with our efforts to diversify export markets, we must try to broaden the range of export products by including more manufacturers in our total export effort.

*Statistics for Profit* also shows the opportunities for local industrial expansion. Canadian imports increased by 11.6 per cent, from \$11,081,153,000 in 1967 to \$12,366,710,000 in 1968. The increase in fully manufactured imports was 16.4 per cent during the same period.

Data for Ontario and Canadian exports are taken from special Dominion Bureau of Statistics reports. The classification used in this book is the Standard Industrial Classification of DBS. Ontario and Canadian exports of selected commodities to principal countries and Ontario's percentage of the Canadian total are shown categorized by sub-sections and groups. Details on Canadian and Ontario exports to other countries, not listed in this part of the publication, may be obtained from the Foreign Market Development Section, Research Branch, Department of Trade and Development, 950 Yonge Street, Toronto 5, Ontario, Canada. Telephone 365-4347.

To assist Ontario businessmen gain new markets for their products and enlarge existing ones, the Trade and Industry Division of the Ontario Department of Trade and Development offers free advisory service on a confidential basis. These services are available to any Ontario company interested in exporting products and services, acquiring new product lines, entering manufacturing agreements or joint ventures, or selling and buying know-how, patents and trademarks.

# *United States Imports and Canadian Export Opportunities*

United States is the most important foreign trade partner of Canada. In 1968, 23.3 per cent of all United States exports went to Canada, and Canada supplied 27 per cent of total United States imports.

Some highlights (in U.S. dollars):

“Food and Live Animals.” U.S. imports in 1968 totalled \$4,577,400,000, of which Canada contributed \$355,000,000, or 7.7 per cent. In this category, Fish — Fresh and Simply Processed” was Canada’s most important export item, amounting to \$151,300,000, or about 43 per cent.

“Alcoholic Beverages.” Canada was the second largest supplier of this product to United States, which had a total export value of \$157,000,000.

“Crude Materials, Inedible Except Fuels.” Of total U.S. imports of \$3,297,400,000, Canada supplied \$1,616,700,000 worth, or 49 per cent. In this category, Canada was the U.S. principal source of “Wood — Shaped, Pulp, and Waste Paper” and “Iron Ore and Concentrates.”

“Mineral Fuels, Lubricants, and Related Materials.” About 25 per cent of these imports came from Canada. Most important Canadian export in this category was “Petroleum — Crude and Partly Refined,” amounting to \$432,600,000.

“Chemicals.” Canadian exports to the U.S. rose to \$291,500,000 in 1968, with the increase mainly in “Fertilizers — Manufactured.” “Manufactured Goods Classified Chiefly by Material.” Some of Canada’s most important exports are found in this category, which, in 1968, totalled \$2,006,300,000. Again in this category, “Paper and Paperboard” exports to the U.S. totalled

\$870,200,000; "Aluminum" \$218,200,000; "Nickel" \$184,000,000, and "Copper" \$173,100,000.

"Machinery and Transport Equipment." Canadian exports to the U.S. totalled \$3,284,600,000. In this category, "Road Motor Vehicles" worth \$2,168,100,000 were exported to the U.S. in 1968. Next in order of importance were "Power Generating Machinery — Non-Electric \$316,800,000; Agricultural Machinery and Implements \$184,900,000, and "Aircraft" \$184,700,000.

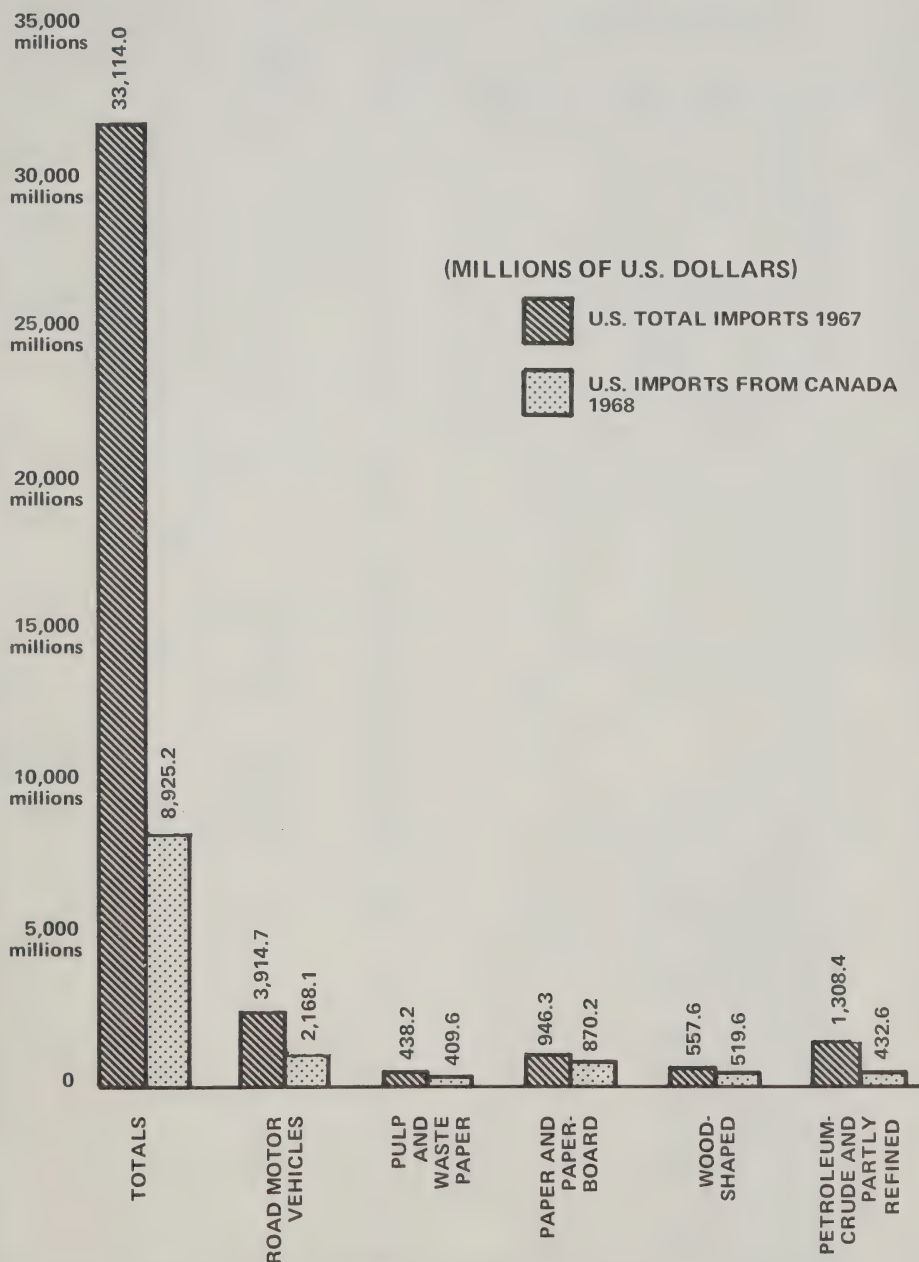

"Miscellaneous Manufactured Articles." The most important export in this category was "Furniture," with sales to the U.S. totalling \$53,300,000.

Ontario exports to the U.S. in 1968 were \$4,679,800,000 78.4 per cent of total Ontario exports, compared with 75.1 per cent in 1967. The increase in Ontario sales to the U.S. in 1968 occurred largely in the export of motor vehicles and parts, which accounted for about 47.6 per cent of these exports.

Note: The United States Imports and Canadian Export Opportunities section contains selected U.S. imports compiled from reports of the U.S. Bureau of Census for 1967 and 1968. Included are totals for commodity sections and groups, but sub-classes have been chosen on the basis of importance within the group, and whether Canada has a significant share.

The section on Ontario's "Exports to the United States of End Products, Inedible," represents Ontario's fully manufactured exports compiled from DBS material.

# *United Kingdom Imports and Canadian Export Opportunities*

The Canadian share of United Kingdom total imports in 1968 was 6.5 per cent, compared to 7.1 per cent in 1967.

“Manufactured Goods Classified Chiefly By Materials” is the most important category in the section dealing with Canadian exports to the United Kingdom. These totalled in 1968 (in U.S. dollars): \$456,600,000 or 11.2 per cent of total U.K. imports in this area.

Main imports from Canada in this category (in U.S. dollars) were:

Copper \$110,400,000, or 19.6 per cent of total U.K. imports;

Paper and paperboard \$100,400,000, or 23.7 per cent of the total;

Aluminum \$69,300,000, 29.6 per cent of the total.

Next category of importance in terms of value of U.K. imports from Canada is, “Crude Materials, Inedible, Except Fuels.” In 1968, these imports from Canada totalled \$351,500,000, or 12.8 per cent of total U.K. imports in this area. Main U.K. import items from Canada in this category were:

“Nonferrous Base Metal Ores and Concentrates” amounting to \$88,700,000, or 35.2 per cent of total U.K. imports; “Wood-Shaped” amounting to \$73,600,000, or 14.2 per cent of total, and “Iron Ore and Concentrates” amounting to \$48,000,000, or 23.7 per cent of total U.K. imports.

In the category “Food and Live Animals,” the Canadian share in 1968 totalled \$229,800,000, or 5.6 per cent of the total. The most important Canadian single import item in this category was “Wheat-Unmilled” amounting to \$113,800,000, or 40.2 per cent of total U.K. imports.

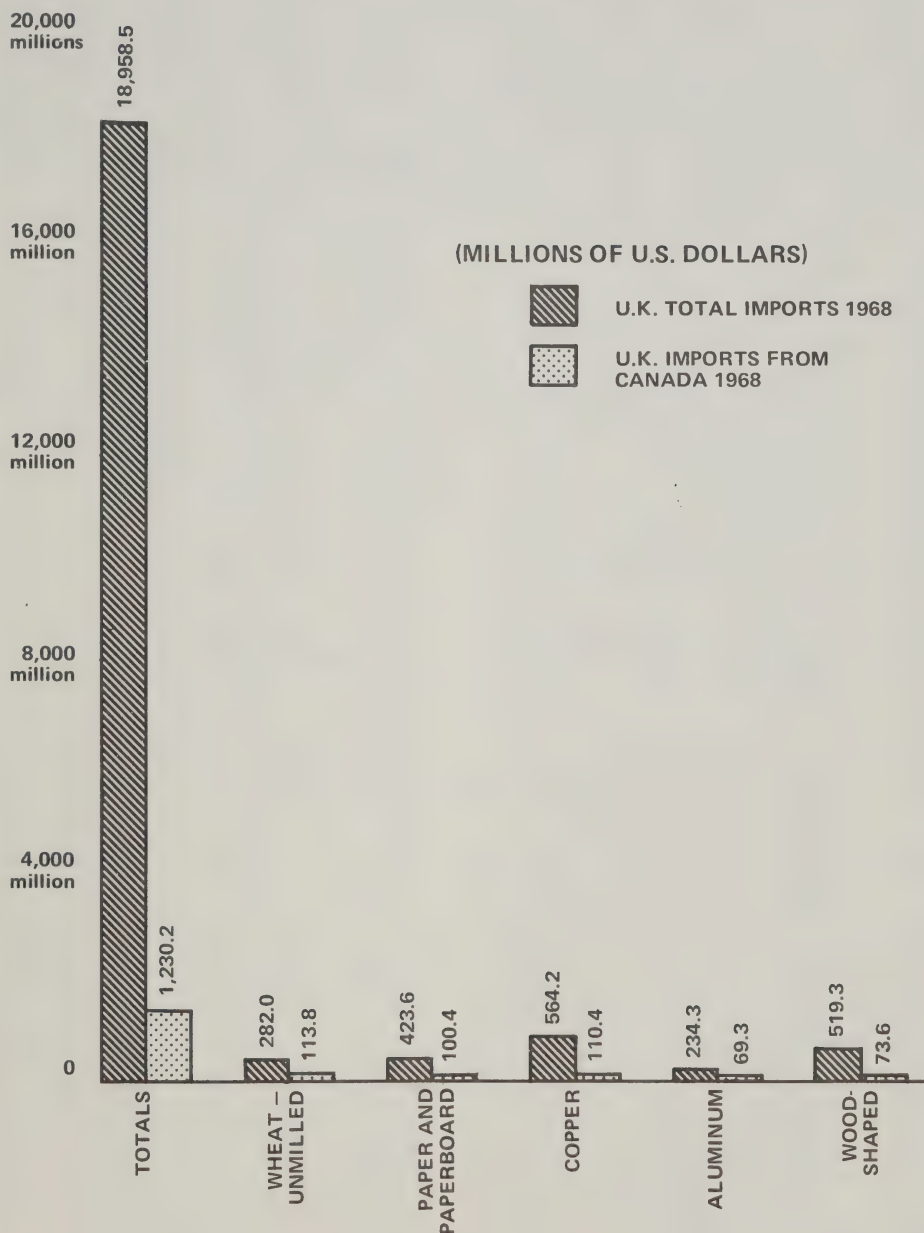

Other important U.K. imports from Canada in 1968 were: "Tobacco-Unmanufactured," \$42,400,000 and "Chemicals" \$47,700,000.

The share of Ontario exports to U.K. in 1968 was 37.3 per cent of total Canadian exports, compared to 36 per cent in 1967. Ontario exports of "End Products, Inedible" in 1968 were \$46,300,000, or 10.1 per cent of total Ontario exports to the U.K.\*

NOTE: This data is taken from United Nations Department of Economic and Social Affairs Reports, which are compiled from information submitted by the United Kingdom. The Standard International Trade Classification (SITC) is used as the United Nations' reporting system.

\* This part is compiled from DBS data and covers fully manufactured products requiring no additional fabrication before use.

# *Opportunities for Canadian Industry*

Canadian imports are increasing steadily. This increase is in part the result of our increased production capacity, our rising purchasing power and the upward trend in our standard of living. However, there is a wide range of imported products which can be produced in Canada, or are already being produced in Canada.

Total Canadian imports by sections, 1967-1968, were as follows:

	<u>1967</u>	<u>1968</u>
	(\$'000)	(\$'000)
Live Animals	21,895	15,554
Food, Feed, Beverages and Tobacco	861,596	902,633
Crude Materials, Inedible	1,062,791	1,126,744
Fabricated Materials, Inedible	2,310,208	2,434,638
End Products, Inedible	6,555,397	7,628,230
Special Transactions — Trade	269,266	258,911
	<hr/>	<hr/>
TOTAL	11,081,153	12,366,710
	<hr/>	<hr/>

Source: D.B.S. Trade of Canada.

While Canada's total imports in 1968 increased by 11.6 per cent over the previous year, imports of "end products, inedible" increased by 16.4 per cent.
